Let's Start!

Pronunciation Spot: What destroyed Pompeii?

Learning Outcome

Describe detailed facts about events or actions in work and social contexts, in written or spoken situations.

Ask your partner:

- What do you know about the early Roman Empire?
- What do you know about Pompeii?

Can Do Statements

- I can talk about history and civilization.
- I can link final consonants to beginning vowels.
- I can say and use words like *volcanic* and *activity*.

Let's Explore!

Mount Vesuvius spewed ash and **pumice***!

* "Pumice" is a type of volcanic rock, produced with lava, water and gas as it's thrown out of a volcano.

Instructions: Read the text aloud.

For more than 1,500 years, the city of Pompeii lay almost entirely buried under volcanic ash and pumice. The mighty Mount Vesuvius had erupted spewing tons of sooty ash. Citizens who had the ability to do so, fled on boats to safety when they realized the severity of the situation and the potency of the volcano. This dramatic event, horrific for the inhabitants, has given us a fantastic legacy.

Much information about the domestic, artistic and athletic lives of the people who lived in this city which had a complex water system, an amphitheatre, gymnasium, and a port is known in great detail. The incredible discovery and careful reconstruction of Pompeii has provided valuable information on life in an Italian city 2,000 years ago.

At the time of the eruption, Pompeii had reached its high point in society as many Romans frequently visited Pompeii on vacations. It is the only ancient town where the whole topographic structure is known precisely as it was, with no later modifications or additions.

Excavations have revealed that few valuable objects were left behind in Pompeii. Archaeologists believe that people took their valuable items with them and also came back later to look for things. People even removed some of the marble on the buildings! However, it's a fallacy to think that all of the people in Pompeii escaped. Many did not. They were covered, along with the city, in the wet ash that engulfed it. The ash dried, then hardened, sealing everything in. Their bodies disintegrated over time, leaving empty molds.

From these, archeologists were able to create amazing true-to-life statues of Pompeians in the privacy of their last moments. Some of them can be viewed, frozen in time forever, in the museum at Pompeii.

Let's Practice!

Pompeii has astonished* visitors with its incredible architecture.

*"Astonished" means amazed.

Instructions: Write the mystery sentences in the correct order. Read the sentences aloud. Check your pronunciation with your instructor.

1. additions. / The whole / is known / it was, / with no later / precisely as / modifications or / topographic structure
2. to think that / in Pompeii / However, / escaped. / it's a fallacy / all of the people
3. ash that / They were covered, / the city, / in the wet / engulfed it. / along with
4. sealing / dried, / The ash / everything in. / then hardened,
5. able to / Pompeians. / create / statues of / amazing / Archaeologists were / true-to-life

Let's Practice!

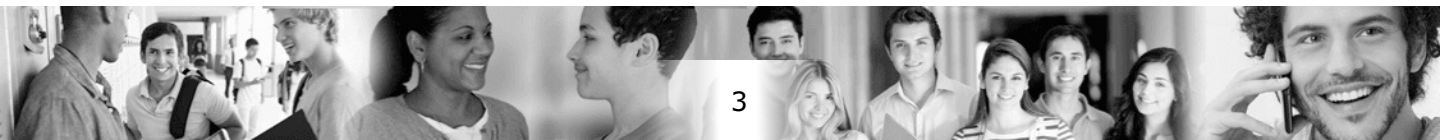

The remains* of Pompeii tell us a lot about this ancient civilization.

*The "remains" of a place are things that are left from it, like in the old city of Pompeii.

Instructions: Proofread the paragraph. Cross out the incorrect words. Write the words correctly. There are 10 wrong words in the paragraph. Practice saying the text to a partner.

Much of the life in Pompeii is knew in great detail. The city have a complex water system, a amphitheater, and a port. The discover and reconstruction of the city have provide information about the life of an Italian city 2,000 years ago. Excavate have revealed values objects in Pompeii. The town of Pompeii yourself have not suffered any modifications or add.

|----------|-----------|
| 1. _____ | 6. _____ |
| 2. _____ | 7. _____ |
| 3. _____ | 8. _____ |
| 4. _____ | 9. _____ |
| 5. _____ | 10. _____ |

Extension Activity

Make up a story from Pompeii.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Read the text again. Think about what happened at Pompeii.
- Write a 150 word narrative about a person who lived in Pompeii when the volcano erupted.
- Add vocabulary words that end in -ic, ity and -cy.
- Highlight places in the narrative where words ending in consonants link with words beginning in vowels.
- Practice reading your narrative aloud being careful to pronounce the words ending in suffixes and word links correctly.
- Read your narrative aloud to a partner.

Self-Assessment

Yes

No

I write a narrative about a person who lived in Pompeii when the volcano erupted.

☐ ☐

I add vocabulary words that end in -ic, ity and -cy.

☐ ☐

I highlight ending consonants linked to beginning vowels.

☐ ☐

I read the narrative aloud, carefully pronouncing suffixes and word links correctly.

☐ ☐

Target Words

- volcanic** (adjective): composed of material from a volcano
e.g. For more than 1,500 years, the city of Pompeii lay almost entirely buried under volcanic ash and pumice.
- eruption** (noun): the issuing forth of molten rock, steam and lava from a volcano
e.g. At the time of Mount Vesuvius eruption, Pompeii had reached its highest point in society.
- to erupt** (verb): to be violently forced out
e.g. The mighty Mount Vesuvius had erupted covering a large area in sooty ash.
- to spew** (verb): to send out forcefully and in large amounts
e.g. Miles of hot lava and ash were spewed when Mount Vesuvius erupted.
- severity** (noun): harshness, seriousness
e.g. The citizens fled on boats to safety when they realized the severity of the situation and the potency of the volcano.
- potency** (noun): power and strength
e.g. Citizens fled on boats to safety when they realized the severity of the situation and the potency of the volcano.
- mighty** (adjective): powerful
e.g. It was a mighty eruption because of the huge amount of lava and ash it produced.
- modifications** (noun): changes, adaptations or adjustments
e.g. It is the only ancient town where the whole topographic structure is known precisely as it was, with no later modifications or additions.
- fallacy** (noun): a misleading argument or false idea
e.g. It's a fallacy to think that all of the people in Pompeii escaped.
- to engulf** (verb): to surround and cover completely
e.g. They were covered, along with the city, in the wet ash that engulfed it.

Learning Points

Linking: Consonant + Vowel

Linking is very common in natural conversation. Linking happens when certain sounds are connected. This happens between function words (like articles or prepositions) and content words (like nouns or verbs). It also happens particularly when there is a consonant at the end of one word and a vowel at the beginning of the next.

For example:

Get out ...

You pronounce this as: **get_out** (getaut)

This linking pattern not only joins two words, but can also link three or more words together.

For example:

Have an egg ...

You pronounce this as: **have_an_egg** (havenegg)

Read these sentences aloud slowly and then more quickly, focusing on linking the consonant and vowel sounds together:

*They lived in this city which **had a** complex water system, **an amphitheatre**, gymnasium, **and a** port. Pompeii has provided valuable information on life in **an Italian** city 2,000 years ago. The whole topographic structure is known precisely as it was, with no later **modifications or additions**.*

*However, it's a fallacy to think **that all** of the people in Pompeii escaped.*

*They were covered, along with the city, in the **wet ash** that engulfed it.*

*The ash dried, then hardened, **sealing everything in**.*

*Archaeologists were able to **create amazing** true-to-life statues of Pompeians.*

*Archaeologists believe that people took their **valuable items** with them.*

Stress with Suffixes: One and Two Syllables Before the Suffix

When you look at words in reverse, from the end of the word toward the front, a pattern of stress starts to appear.

These patterns can help you become familiar with how certain words are pronounced.

For instance, the words *classic*, *specific*, and *economic* all include the -ic suffix. They are stressed on the first, second, and third syllables, respectively. The stress patterns can only be found when it is understood that syllables must be counted from the end of the word toward the beginning of the word.

Learning Points

Let's look at the words *classic*, *specific* and *economic*. They all end in the suffix -ic. When you read them aloud, they do not necessarily follow a pattern. But, try looking at them in reverse. You will notice a pattern.

Other suffixes have different rules. When you look at words with the suffixes -ity and -acy, you will notice a slightly different pattern. Look at the chart to see this pattern. The bolded syllables are stressed.

Three syllables before the suffix	Two syllables before the suffix	One syllable before the suffix	-ic -ty -cy
		class	ic
	spe	ci	fic
ac	ti	vi	ty
	le	ga	cy

Try reading these sentences from the text. Focus on saying the words with these suffixes correctly:

*Pompeii has left us a **legacy**.*

*Citizens who had the **ability** to do so, fled on boats to **safety** when they realized the **severity** of the situation.*

*Much information is known about the **domestic**, **artistic** and **athletic** lives of the people there.*

Examples:

- However, it's a **fallacy**, to think all Pompeians escaped.
- These are statues of Pompeians in the **privacy** of their last moments.
- They realized the gravity of the situation and the **potency** of the volcano.
- At the time of the eruption, Pompeii had reached its high point in **society**.
- For more than 1,500 years, the **city** of Pompeii lay almost entirely buried.
- It was buried under **volcanic** ash and pumice. This **dramatic** event, **horrific** for the inhabitants, has given us a **fantastic** legacy.
